

Absolute reliability and traditional design for the minimal OG22E. The 220mm diameter knife and the compact body make it ideal for home use though it has all the features of a professional slicer. Designed in full respect of the safety directives in force and for making cleaning as easy as possible. The knob on the sharpener cover and on the knife cover facilitates the grip when demounting them. The on/off push button with NVR device and the fixed support of the product holder prevent the operator from electrical and mechanical injuries.

PROFESSIONAL USE
